ANATOLII ZORIN

— Web Developer —

I've always enjoyed creating something new.

Programming helps to realise this desire.

Since 2016, I have combined the administrative work as CEO with the work of Digital Marketer (Google Adwords, Google Analytics, Search Engine Marketing), Web Designer (Photoshop, Illustrator, Figma) and Frontend Developer (Javascript/HTML/CSS).

In 2020, I took up intensive study of Backend (Java, Scala, Kotlin).

In 2021, I restored and updated my knowledge of Frontend (Vue, Angular, React).

I'm easy learning. I have good analytical skills.

I'm comfortable working in a team or solo.
